The Future of Assessment: Developing a Compelling Shared Vision

VectorStock®

VectorStock.com/336264

A vision of the future of assessment is emerging at SSIS elementary. We want to inform parents about where assessment is heading, and the direction of our progress reports. We also want to seek input from parents as this vision is made more clear. Please join us for an important discussion that will help answer these questions:

- What are the three phases of Assessment?
- What are the different types of Reporting?
- What is the difference between a 'Progress Report', 'Report Card', and 'Reporting System'?
- What could our 'Reporting System' of the future look like?

Host:

Daniel J. Keller, PhD
Elementary School Principal
